DETAILED ACTION

1. This action is responsive to amendment filed 01/23/04.
2. Claims 1-7, 9 and 11 are pending in the application.

Allowable Subject Matter

3. Claims 1-7, 9 and 11 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1, the prior art does not teach a method for partitioning a 3D graphical environment for displaying images of objects in a database, comprising: starting with the predetermined node, for each area corresponding to each parent node in the tree having at least two associated child nodes: dividing the associated children nodes of the parent node into groups of nodes each dependent on a combined normalized node weight of each group of nodes; partitioning the area associated with the parent node and assigning areas created by partitions to each group dependent on each group's combined weight; repeating dividing and partitioning for the groups associated with the parent node until each group includes a single node.

Claim 7, the prior art does not teach deriving a hierarchical tree representative of a database of objects from object metadata; dividing a parent's associated child nodes into N groups of one or more nodes each dependent on a combined normalized node weight; determining a combined normalized node weight for each group; partitioning an

area associated with the graphical environment into the areas such that the areas are proportional to the weights of the group.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
